Experience

Self-employed researcher, consultant, educator. Consultation work for organizations interested in Fab Labs, Makerspaces and Community Innovation Spaces. Public and private grant proposals. Teaching. Book project "Handbuch Fab Labs". Meta-Lab Rhein-Ruhr (in formation).	2015–today
Lab leader. I was involved in the setup of RUB-Makerspace as deputy general manager as well as lab leader for the Digital Lab and the Plastics Lab. RUB-Makerspace is a 2000sqm space with a team of 16 people and multiple (sub-)labs. Ruhr-Universität Bochum.	2020–2023
Researcher, project manager, educator. After graduating, I stayed at Uni Siegen to continue building Fab Lab Siegen into a sustainable infrastructure. Apart from the Lab, I worked on/in in different projects (see below), published and did a lot of teaching. University of Siegen.	2015–2019
Guest researcher, consultant. Field research, consultations and development of joint project proposals in/with collaborators from the Middle East. University of Birzeit, Univ. of Technology Oman, Goethe Institute, others, (mostly) Palestine.	2014–2019
Founder and manager. I founded Fab Lab Siegen and managed it on its journey from a student initiative in a literal storage room on campus outside the city through many locations to a big, wonderful, colorful, open and community-oriented space with a funded team and filled with people, ideas, tools and machines right in the city center. Siegen.	2013–2019
TA, student researcher. Teaching assistant (mostly in HCI), research assistant (mostly with qualitative field work), IT and media tech support/maintenance. Universities of Siegen and Duisburg-Essen.	2009–2015

Education

Dissertation work - About Fab Labs and Makerspaces as (public) infrastructures. University of Siegen and self-employed.	2015–today
M.Sc. Human Computer Interaction (honors) - Socio-technical systems design based on qualitative methods. University of Siegen.	2012–2015
B.Sc. Applied Cognitive and Media Sciences - Computer Science and Psychology (without advanced engineering and clinical aspects), grounded in quantitative methods. University of Duisburg-Essen.	2009–2012

Community roles

I (co-)chaired Fab:UNiverse - the annual conference of Fab Lab managers at German universities - multiple times and help maintain its website. I've also (co-)organized many different events, temporary (Maker)spaces and meetups such as the World Usability Day Siegen (2014-2018).

I was reviewer/chair for conferences and journals like CHI, JCSCW, C&T or M&C. Occasionally, I've been asked to join expert committees about community innovation spaces. I've also been an elected member of different bodies of (self)-governance such as the Senate commission on Strategic University Development at Uni Siegen and head of the student

representatives ("Fachschaftsräte") at Uni Duisburg-Essen and Uni Siegen respectively.

Memberships: Verbund Offener Werkstätten, global Fab Lab network, Chaos Computer Club, ver.di. **Past:** UPA, GIG, Hasi.

Teaching

I enjoy teaching and learning a lot. I've always made it a point to try and be open in teaching and have frequently had students from other faculties or external guests in my seminars.

At Uni Siegen, I've been responsible for the practical part (and a lot of the lectures) of the annual introduction to Human Computer Interaction for many years, i.e. mentoring up to 40 students per iteration through big, semester-long projects ending in submissions to and wins in national student challenges. Additionally, I've held many different seminars ranging from reading classes on literature about "Making" to very practical seminars on rapid prototyping methods.

At Ruhr-Uni Bochum, I was less involved in structured, academic teaching but taught and learned whatever was needed to help many different Makerspace community members from (many different) disciplines with their - many different - projects.

As a thesis advisor and co-advisor, I have accompanied about 8 Bachelor and Master Students along their paths to graduation. Topics have varied from participatory-design-oriented field investigations to studies about Makerspaces in teacher training to engineering and fabrication of additive tools for industrial processes. Additionally, I've been involved in co-advising state-certified technicians as a pilot project between a university and a technical vocational college.

I've also developed and held lots of safety and infrastructure introductions.

Skills in Keywords

Making - Makerspace operation / management / safety. Rapid Prototyping (many different methods), CAD/CAM, general (basic) coding, (traditional) web development, electronics and integrated systems for rapid prototyping, basic skills in different crafts / workshop and lab areas.

Human Centered Design - UX design, HCI, usability methods, design thinking, convergence of agile and user centered methods.

Projects and People - Project development, social innovation, fundraising, agility / Skunkworks, community and team development, operations (with)in public service and public administration.

Methods - Constructionism, human-centered teaching and learning, mixed-methods, action and field research, participatory methods and participatory action research, (Maker-)space(s) as a method.

Personal

Birth date: 12 June 1987

German: native, English: fluent, French: rudimentaire, Latin: obliviscebam.

I enjoy camping, water, (working on) motorbikes, cooking and books.

Projects and funding

Maker in Residence is an effort at RUB-Makerspace to invite Makers from different disciplines to share knowledge. I co-led the first two funding rounds and managed the 2023 residency.

Regional donors, 20-40.000€ p.a.

2023-today

MentorINN is a project between three universities to found Ruhr School of Design Thinking, to support Design Thinking in academic teaching and to share course material. I was part of the proposal team and occasionally

2022-2024

helped in the project.

Stiftung Innovation in der Hochschullehre ('foundation for digital teaching in academia'), about 20.000€.

SMAPS - the center for smart production systems - was a research-infrastructure project on additive fabrication and smart systems for industrial tooling (mainly forming processes). I was part of the proposal team and briefly involved in the ramp-up and procurement phase. European EFRE-fund (EFRE.NRW), about 3m€.

2019-2022

FAB 101 was a research project of four German universities on Fab Labs in academia. It focused on cooperation, tools, education and infrastructure. I developed the core idea, led the proposal, was project manager and part of the operative team.

2017-2020

Federal Ministry of Education and Research, about 1.2m€.

YALLAH - "You All Are Hackers" was a student exchange / hackathon project. Students from Palestine and Germany visited each other, worked on socio-economical issues using "maker-methods" and created an art exhibition. I developed the core idea after my own visits to Palestine as a student, led the proposal and helped recruit and set up the staff who took over. German Academic Exchange Service (DAAD), about 225.000€.

2016-2018

ZEIT.RAUM Siegen was a project between a museum, three university chairs and Fab Lab Siegen to develop a 3D-printed, interactive city model and a regional Wiki for a museum installation. I coordinated the ideation phase, wrote most of the proposals, was part of the negotiation team, built the first prototypes for model and wiki and recruited the project staff.

2016-2018

Regional societies, University of Siegen, other sources, about 190.000€ (funding brochure I designed).

Internet-Cafe4Refugees was a project we set up when Uni Siegen housed hundreds of refugees. We provided tech support, hardware and internet connection together with the local freifunk.net community.

2015-2016

Volunteer work, hardware donations and enough local funding for student aids to cover daily opening hours.

Fab Lab Siegen was my baby for many years and my first real experience in regards to being a founder and the world of fundraising. My old team is still running and growing the Lab and it has become local infrastructure. Calls for student projects, donations, other sources, about 100.000€ in money and more in hardware donations during the first three years. Later, funding strategies changed when the project became official university infrastructure. The spaces for the lab were and are co-sponsored by private-public partnerships.

2013-today

CUBES was a research project on community-based innovation in software and usability for small and medium sized enterprises. I was involved as a student, then researcher, then (interim) project manager for the project reporting and closing.

2012-2015

Federal Ministry for Economic Affairs and Energy, about 800.000€.

Awards and honors

Honorable Mention Paper Award, "Mensch und Computer" (M&C) conference of the German Informatics Society (GI) for Praktiken der Nutzerintegration im Entwicklungsprozess von KMU (see below).

2015

Arthur-Woll award for an exemplary master's thesis, University of Siegen and association for the support of the economic faculty.

2015

pwc award for best graduate of the faculty, University of Siegen and PricewaterhouseCoopers.

2015

Scholarship Tallinn Summer School on research methods in Human-Computer interaction, University of Siegen.

2014

First Prize Student Usability Challenge, German Informatics Society (GI).

2013

- Handbuch Fab Labs: Einrichtung, Finanzierung, Betrieb, Forschung & Lehre** by Iris Bockermann, Jan Borchers, Anke Brouck, Marcel Lahaye, Antje Moebus, Stefan Neudecker, Oliver Stickel, Melanie Stolz, Daniel Wilkens, René Bohne, Volkmar Pipek, Heidi Schelhowe. Bombini-Verlag. 2021
