Experience

- Lab Manager at Bochum Makerspace** - I manage two sub-labs (IT and plastics fabrication) and I'm involved in the general management of RUB-Makerspace, a 2000sqm innovation space with a team of 15 people. [Ruhr-Universität Bochum, Germany](#). 2020-present
- Writer, researcher, consultant.** Book project "Handbuch Fab Labs" and consultation work for organizations interested in Maker-/innovation spaces. [Self-employed, Germany](#). 2019 - 2020
- Researcher, project manager.** After graduating, I stayed at Uni Siegen as a researcher to continue building Fab Lab Siegen into a sustainable infrastructure. Apart from the Lab, I worked on/in in different projects (see below) and did a lot of teaching. [University of Siegen, Germany](#). 2015 - 2019
- Guest researcher, consultant.** Field research, consultations and development of joint project proposals in/with collaborators from the Middle East. [University of Birzeit, Univ. of Technology Oman, Goethe Institute, others, \(mostly\) Palestine](#). 2014 - 2019
- Founder and manager.** I founded Fab Lab Siegen and managed it on its journey from a student initiative in a literal storage room on campus outside the city to a wonder- and colorful, open and community-oriented space of about 300sqm filled with people, ideas, tools and machines right in the city center. [University and region of Siegen, Germany](#). 2013 - 2019
- TA, student researcher.** During my student times, I was a teaching assistant (mostly in HCI), assisted in different research projects (mostly with qualitative field research) and was in IT support/maintenance. [Universities of Siegen and Duisburg-Essen, Germany](#). 2009 - 2015

Education

- M.Sc. Human Computer Interaction** (honors) - Socio-technical systems design based on qualitative methods. [University of Siegen, Germany](#). 2012-2015
- B.Sc. Applied Cognitive and Media Sciences** - Combination of Computer Science and Psychology (without the advanced engineering and clinical aspects, respectively), grounded in quantitative methods. [University of Duisburg-Essen, Germany](#). 1998-2002

Publications

- Iris Bockermann, Jan Borchers, Anke Brouck, Marcel Lahaye, Antje Möbus, Stefan Neudecker, Oliver Stickel, Melanie Stolz, Daniel Wilkens, René Bohne, Volkmar Pipek, Heidi Schelhowe - **Handbuch Fab Labs: Einrichtung, Finanzierung, Betrieb, Forschung & Lehre** (an open access book on managing academic Fab Labs). Bombini-Verlag (2021).
- Thomas Ludwig, Oliver Stickel, Peter Tolmie, Malte Sellmer - **shARe-IT: Ad hoc Remote Troubleshooting through Augmented Reality**. Journal on Computer Supported Cooperative Work 30, pp. 119-167 (2021).

Projects and funding

FAB 101 was a joint research project of four German universities on Fab Labs digital fabrication in academic education. I developed the core idea for the project, led the proposal and was overall project manager as well as part of the operative team.

2017–2020

[Federal Ministry of Education and Research, Germany](#), about 1.2m€.

YALLAH - “You All Are Hackers” was a student exchange project. Students from Palestine and Germany visited each other for multiple stays and worked on socio-economical issues using “maker-methods”. I had the project idea after my own visits to Palestine as a student, led the proposal and helped to recruit and set up the staff who took over the project.

2016–2018

[German Academic Exchange Service \(DAAD\)](#), about 225.000€.

ZEIT.RAUM Siegen was a regional project to build a 3D-printed, interactive city model and a regional Wiki for an installation in a local museum. I coordinated the ideation phase, wrote most of the proposals and was part of the negotiation team. Within the project, I built the first prototypes for model and wiki and recruited the staff who finished the project.

2016–2018

[Regional societies, University of Siegen, other sources](#), about 190.000€.

Fab Lab Siegen was my baby for many years and my first real experience in 2013 - today regards being a founder and the world of fundraising. The project is still going and has become infrastructure.

[Calls for student projects, donations, other sources](#), about 100.000€ during the first 2-3 years (later, funding strategies changed) and regionally sponsored space for many years.

CUBES, research project on community-based innovation in software and usability for small and medium sized enterprises. I was involved as a student, then researcher and, in the end, as (interim) project manager the final reporting and project closing.

2012–2015

[Federal Ministry for Economic Affairs and Energy](#), about 800.000€.

Community roles

I co-organized Fab:UNiverse multiple times and maintain its website (it's a conference for Fab Lab managers at universities). I've also (co-)organized a lot of different events, temporary (Maker)spaces and meetups such as the Usability Day Siegen (2014-2018).

I have been an elected member of different bodies of (self)-governance such as the Senate commission on Strategic University Development at Uni Siegen and head of the student representatives (“Fachschaftsräte”) at Uni Duisburg-Essen and at Uni Siegen respectively. Occasionally, I've been

asked to fill roles in regional and national expert committees (mostly in relation to innovation and community spaces).

As a researcher, I was reviewer/chair for conferences and journals like CHI, JCSCW, C&T or M&C.

Teaching

I enjoy teaching and learning a lot. At Uni Siegen, I've been responsible for the practical part of the mandatory introduction to Human Computer Interaction for many years (including a mentoring up to 40 students per iteration through big, semester-long projects, cumulating in submissions to and wins in national student challenges). Additionally, I've held many different elective seminars ranging from reading classes on literature about "Making" to very practical seminars on rapid prototyping methods. I've made it a point to try and be open in teaching and have frequently had students from other faculties or external guests in my seminars.

As a thesis advisor and co-advisor, I have accompanied about 10 Bachelor and Master Students along their paths to graduation. Topics have varied from participatory-design-oriented field investigations to studies about Makerspaces in teacher training to engineering and fabrication of additive tools for industrial processes. Additionally, I've been involved in co-advising state-certified technicians as a pilot project between a university and a technical (vocational) college.

Nowadays, I'm less involved in structured, academic teaching but mostly teach (and learn) whatever is needed to help many different Makerspace users from many different disciplines with their - many different - projects.

Awards and honors

Honorable Mention Paper Award , "Mensch und Computer" (M&C) conference of the German Informatics Society (GI).	2015
Best Graduate of the faculty , University of Siegen, Germany.	2015
Scholarship Tallinn Summer School on research methods in Human-Computer interaction, University of Siegen, Germany.	2014
First Prize Student Usability Challenge, German Informatics Society (GI).	2013

Skills in Keywords

Makerspaces - Rapid Prototyping (different methods), CAD/CAM, general (basic) coding, basic electronics and integrated systems. Space management, development and safety.

Human Centered Design - UX design, HCI, usability methods, design thinking, convergence of agile and user centered methods.

Projects and People - Project development, social innovation, fundraising, agility / Skunkworks, community and team development, operations (with)in public service and public administration.

Methods - Constructionism, human-centered teaching and learning, mixed-methods, action and field research, participatory methods and participatory action research, (Maker-)spaces as a method.

Languages

Native: German
Fluent: English
Basic: French

Personal

Birth date: 12 June 1987
I enjoy camping, kayaking, cooking and good books.

Last updated: October 2022
